ABSTRACT

Statistical data for Mississippi's 15 public community colleges are presented in this report, including information on enrollments, revenues, expenditures, program completions, faculty salaries, dormitory utilization, transportation services, and learning resources in 1989-90. Introductory remarks on the state's two-year college system are followed by tables showing: (1) trends in academic, technical, vocational, and credit enrollments between 1985 and 1989; (2) full-/part-time, credit and non-credit enrollments by college; (3) enrollment by college, resident status, and county of residence; (4) enrollment by age for the state as a whole and by college; (5) sources of revenue and county tax support; (6) student fees and charges; (7) expenditures by function and object; (8) revenues and expenditures of auxiliary enterprises such as food services and housing by college; (9) expenditure per full-time equivalent student by function; (10) program completions by college, gender, and type of award; (11) faculty salaries by college; (12) salary trends in Mississippi compared to the regional average; (13) men's and women's dormitories' utilization by college; (14) daily utilization of transportation services; and (15) funding, staff, and resources of the colleges' learning resources centers. FOREWORD

As the first state to establish a system of public community colleges, the state has fifteen comprehensive community college districts which provide educational programs and services which are accessible to virtually all Mississippi citizens. This has been a goal of these two-year institutions since the first one began admitting students in 1922. All public community colleges are accredited by the Southern Association of Colleges and Schools and the Mississippi Commission on College Accreditation.

This network of institutions operates both university transfer and occupationally-oriented programs. Over sixty percent of the Mississippi high school graduates who attend college do so at the community colleges. A student may transfer earned credits to four-year institutions without loss of credit if the student has followed the recommended course of study. Studies reveal that community college transfer students perform on a par with the native student at four-year institutions.

Community colleges are the primary delivery mechanism for postsecondary occupational programs in Mississippi. These programs of two-years or less duration are designed to prepare students for immediate employment and for upgrading skills of those currently employed. Training programs in more than one hundred occupational skills are provided by the schools. Community colleges also provide a variety of continuing education, community and public service activities. The institutions are funded by state appropriations, local district taxes, student fees and federal grants.

A characteristic of Mississippi's community colleges is their flexibility to respond to needs of a given segment of the state's society. This sensitivity is the result of an administration and a board of control operating at the local level. Each college district has a local governing board which employs the president and faculty, owns property, establishes budgets for operation and capital improvement, and sets policies for the general governance of the institution. Cooperation by the various institutions on state-wide endeavors is accomplished through the Mississippi Community and Junior College Association, a voluntary organization of the institutions represented by their presidents.

State coordination and oversight is provided by the State Board for Community and Junior Colleges, which on July 1, 1986, was named successor to the Junior College Commission. With regard to the system of community colleges, the State Board establishes standards for operation, administers state appropriations, approves vocational and technical programs and attendance centers, assembles reports, and provides general coordination. The State Board of Education (K-12) serves as the State Board for Vocational Education, and through its Bureau of Vocational and Technical Education administers programs on secondary and post-secondary level.
